SPECIFICATIONS

Construction	Multi Level loop (Endless Design)	
Yarn	100% Nylon AE	
Colour system	100% Solution Dyed	
Stitches & Gauge	1/10 (36/10 Cm) 	
Total Tufted Pile Weight	850 GSM (25 Oz/Yd2)	
Total Weight	5200 gm/m ² (+/- 5%)	
Pile & Total Height	2.0~5.0mm (+/-0.5mm) & 8.00mm (+/-1.0mm)	
Primary Backing	Non Woven (Lutrador by Freudenberg)	
Secondary Backing	High Performance Precoat PVC reinforced with Fiberglass	
Tile Size	50cm X 50cm	
Packing	20 Tiles/Box (5.00 SQM)	
Area of Use	Class 33	Heavy Commercial
Fire Class	EN13501-1:2018	Cfl-s1
Formaldehyde	CRI Identification 20201027-III133 17X	
Hexapod Test	BS EN ISO 9405:2017	Change in appearance = 3,5 Change in color = 3-4
Critical Radiant Flux	ASTM D-7330	3.8 kW/m2
Certifications	TUV ISO 9001:2015, TUV ISO 14001:2015, KAN, CRI+, Singapore Green Building Council, K3L No = 21-D-000204 TKDN No = 1628/SJ-IND, 8/E-TKDN/2/2025

- Specifications are subject to change to enhance product performance.

Recommendations:

Choosing the Perfect Carpet
Selecting the right carpet is about balancing style, comfort, and quality. At Belsim, we offer a diverse range of high-quality carpets to suit every taste. Our team is here to guide you, helping you find the perfect match that aligns with your needs and desires.

Seamless Installation
Proper installation is key to ensuring your carpet looks great and lasts for years. Our expert installers take care of everything, from precise measurements to seamless fitting. With professional techniques and detail, we guarantee a flawless finish that enhances your space.

Easy Maintenance for Lasting Beauty
Keeping your carpet in top condition is simple with the right care. Regular vacuuming, prompt stain removal, and occasional deep cleaning will preserve its beauty and softness. Belsim also provides expert advice and solutions to help you maintain your carpet's durability and charm. For more details and warranty info, please visit us at: www.BelgotexSimachi.com

CMC's patented ColorPoint tufting machine produces carpet that is more desirable and sophisticated - but with the agility and efficiency of a tufting machine. With ColorPoint, there are no buried yarn ends on the face, giving you full-gauge coverage and density. This means you can produce lower weight, better-performing constructions, with vivid colors, pinpoint accuracy, unmatched detail, and enhanced product durability. Our ColorPoint Machine comes in Loop or Cut & Loop models, making it perfect for the Hospitality, Contract, Residential, and Rug markets.

ColorPoint Loop or Cut & Loop

With CMC's ColorPoint, you can manufacture all cut-pile multi-color products or you can produce patterns with varying amounts of cut and loop. This patented technology allows for multiple single-color concentration areas with 100% coverage. Using six different colors or more, you can tuft unprecedented loop pile construction and incredible multi-color patterns, including multiple pile heights in the loop-pile portion of a pattern.

ColorPoint Loop

Introducing the Colorpoint Loop Machine. Our patented Colorpoint technology can now be used in a 1/10" or 1/12" gauge platform. The Colorpoint Loop machine gives carpet manufacturers the ability to use smaller denier yarns which translates to lighter weight (down to 10-13 ounces) carpet at full gauge coverage.
